

Our Study Programmes

Faculty of Life Sciences: Food, Nutrition and Health

**Lebensmittel- und Gesundheits-
wissenschaften (B.Sc.)**

**Food Quality
and Safety (M.Sc.)**

**Food System
Sciences (M.Sc.)**

**Global Food, Nutrition
and Health (M.Sc.)**

www.lgw-bachelor.uni-bayreuth.de

Lebensmittel- und Gesundheitswissenschaften (B.Sc.)

This interdisciplinary Bachelor's programme integrates elements from the natural sciences, social sciences, economics, and law to provide a holistic perspective for addressing complex challenges within the areas of food, nutrition and health. Our students learn to understand current global challenges from an interdisciplinary perspective and to develop forward-looking solutions.

Admission restrictions: none

Lecture language: German

Enrolment: from 15.04. (for the Winter Semester)

www.foodquality.uni-bayreuth.de

Food Quality and Safety (M.Sc.)

This Master's programme is interdisciplinary in design, combining a life science focus (e.g. biology of crop plants and animals, food microbiology, biochemistry and physiology of nutrition, food chemistry and toxicology) with an approximately equal share of legal, social and economic studies. This course is suitable for students with a Bachelor's degree, e.g. in natural, nutrition or health sciences.

Lecture language: English

Application: 01.03.–15.06. (for the Winter Semester)

www.food-system-master.uni-bayreuth.de

Food System Sciences (M.Sc.)

This Master's programme offers an crossdisciplinary curriculum integrating different aspects of the food system, allowing students to gain insights into the interfaces between Food Chemistry, Human Physiology, Food Law, and the Bioeconomy. The subsequent specialisation in one of these disciplines enables students to make a significant contribution to ensuring a sufficient and high-quality food supply for the growing world population. This course is suitable for students holding a Bachelor's degree in a diverse range of fields, including natural sciences, life sciences, social sciences, law, business/economics, as well as nutrition and health sciences.

Lecture language: English

Application: 01.03.–15.06. (for the Winter Semester)

www.globalfood.uni-bayreuth.de

Global Food, Nutrition and Health (M.Sc.)

This Master's programme offers an interdisciplinary education for global decision-makers at the interface between global health and the world food system. It combines insights from health and nutritional sciences with an interdisciplinary social and behavioural science perspective that draws on political science, law, sociology and public health. This course is suitable for students with a Bachelor's degree in nutrition and/or health sciences.

Lecture language: English

Application: 01.03.–15.06. (for the Winter Semester)

Numbers, Dates, Facts

- **Winter Semester 2020/21:**
Introduction of the Master's programme
Food Quality and Safety (M.Sc.)
- **November 2020:** Teaching starts with 18 students.
- **Summer Semester 2021:**
Introduction of the Master's programme
Global Food, Nutrition and Health (M.Sc.)
- **Winter Semester 2021/22:** Introduction of the Bachelor's programme *Lebensmittel- und Gesundheitswissenschaften (B.Sc.)*
- **Winter Semester 2023/24:**
first graduation (Master)
- **Winter Semester 2024/25:**
Introduction of the Master's programme *Food System Sciences (M.Sc.)*; approx. 400 students (nearly 60 % international students), first graduation (Bachelor), 22 doctoral projects
- The introduction of further study programmes is in progress.

Studying at the Faculty of Life Sciences: Food, Nutrition and Health

Get fit for the challenges of the present! Join us to discover how to effectively shape future prospects in a sustainable manner.

Our Faculty offers great opportunities to work on the extraordinarily important future questions surrounding food, nutrition and health in an unprecedented interdisciplinary and international orientation. Our interdisciplinary study programmes produce excellently trained scientific specialists who can competently combine concepts and ways of thinking from different disciplines relevant to food, nutrition, and health.

The quality of our study programmes is particularly important to us. We strive to educate our students at the highest level in an application-oriented and research-based approach. All degree programmes at the Faculty of Life Sciences have been successfully accredited as part of the University's internal quality management system.

Interested? Taste it!

Are you hungry for innovative and interdisciplinary bachelor's and master's programmes in the emerging field of life sciences? Here you can taste it!
